| with a processor of the image transfer device, automatically merging the electronic data with the image read by the scanner; and	On information and belief, the accused product utilizes a processor of the image transfer device (e.g. the processor inherent in a user's smartphone) to automatically merge the electronic data (e.g. information regarding a user's offer selection) with the image read by the scanner (e.g. the captured image of a receipt). As shown below, a user is able to view a multitude of offers and select those offers that correspond to a receipt they are uploaded. Based on this, the offers selected must be merged with the receipt before they are uploaded to the Coupons.com system for verification.
